PROJECTS

REPLroom | [View Project](#) | [View GitHub](#)

May 2020

- A live collaborative workspace for a user to code in JavaScript repl, video call, text chat, and share whiteboard
- Developed Code Mirror terminal to display results after evaluating user code using web worker and syntax tree
- Created functionality to video call/chat and show who is currently typing using Socket.io and OpenTok
- Built modal to invite people by sharing link or via email using Nodemailer

ECommerce Site | [View Project](#) | [View GitHub](#)

April 2020

- An e-commerce website for members as well guests to browse and buy products using ReactJS, Redux, NodeJS, Express, Sequelize, PostgreSQL, HTML, CSS, JavaScript
- Designed and implemented shopping cart for members and guests with state and inventory management
- Developed navbar to show products by categories and created admin page to allow administrative workflows
- Wrote RESTful API endpoints to supply front end with relevant data using Express and Sequelize ORM

Snake Game | [View Github](#)

April 2020

- Created a vintage snake game using the React Phaser library, CSS and HTML
- Managed game lifecycle by keeping track of points, increasing the length of the agent on reward and ending the game based on exit rules

WORK EXPERIENCE

Publicis.Sapient, NY – Front End Developer

January 2018 – August 2019

Consultant at Goldman Sachs, NY – Front End Developer

- Redesigned the existing global trading portal to make the product efficient, data scalable and market competitive
- Converted wireframes into a pixel perfect, responsive, cross browser supportable website using HTML, CSS, SASS
- Developed functionalities to place trades, verify trades, show error and warning using snack bar, display trade summary using modal, etc. using ReactJS, Redux, JavaScript
- Wrote test cases, in Enzyme and Jest, to test high-quality web and to ensure the working of functionality

Consultant at Federal Bank of Philadelphia

- Designed education website for the client to add functionalities, provide a modern user interface for better user experience
- Built reusable components to perform functionalities like filtering, sorting, pagination using ReactJS, Redux, JavaScript
- Created responsive web pages from Zeplin wireframes, using HTML, CSS that were cross browser supportable
